

MINING & HEAVY INDUSTRIAL LIGHTING

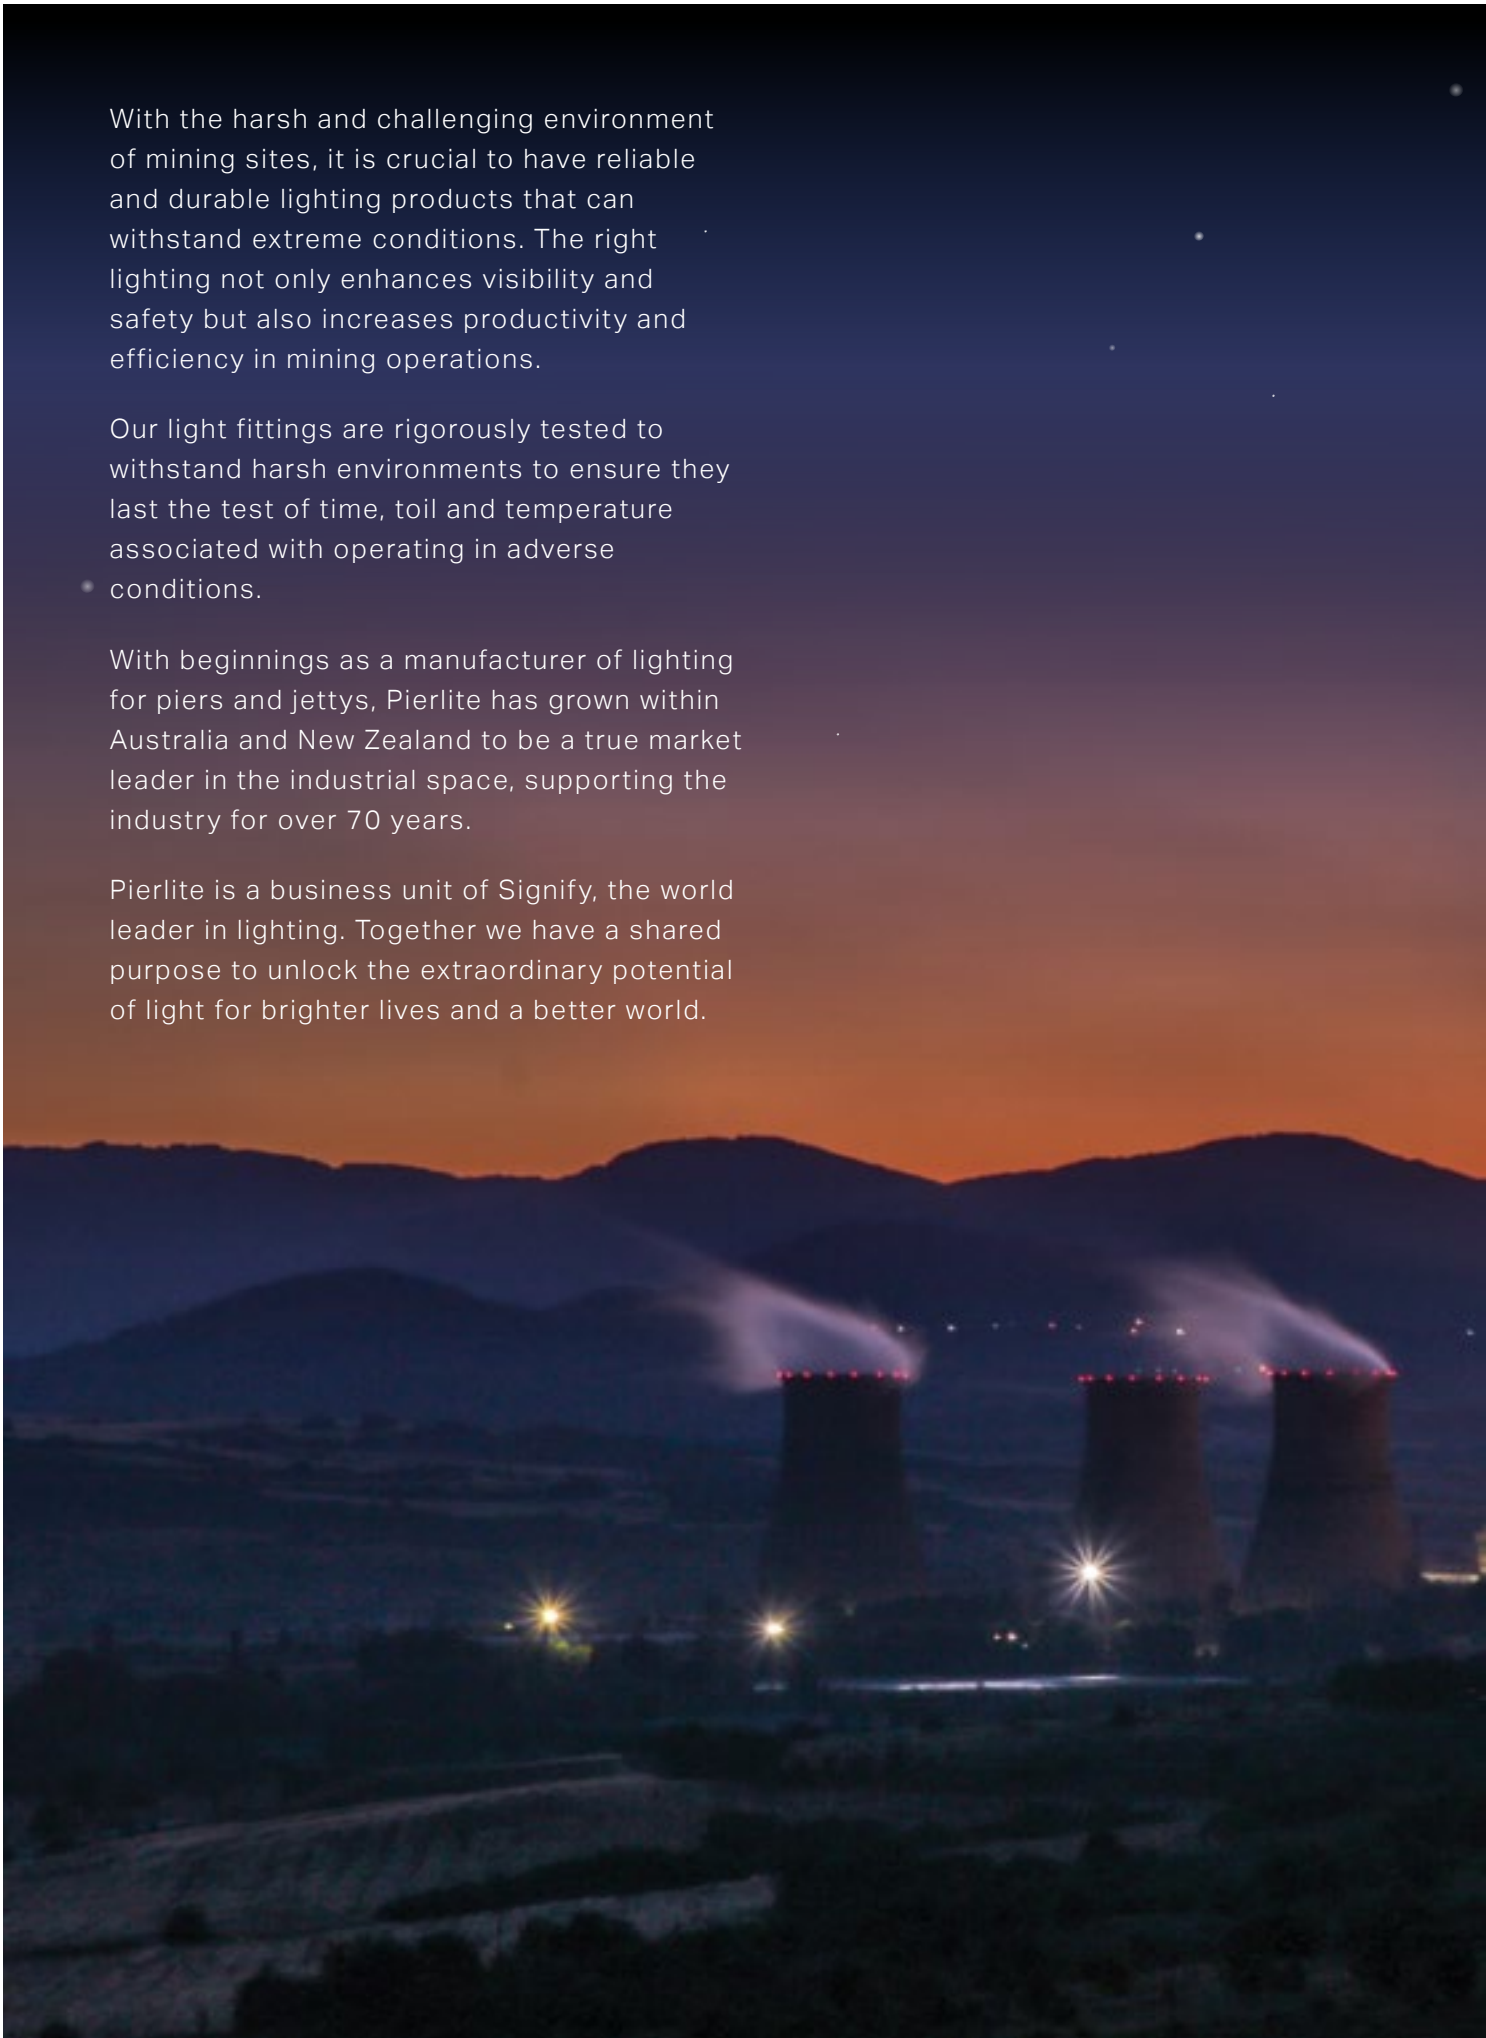

2024

With the harsh and challenging environment of mining sites, it is crucial to have reliable and durable lighting products that can withstand extreme conditions. The right lighting not only enhances visibility and safety but also increases productivity and efficiency in mining operations.

Our light fittings are rigorously tested to withstand harsh environments to ensure they last the test of time, toil and temperature associated with operating in adverse conditions.

With beginnings as a manufacturer of lighting for piers and jettys, Pierlite has grown within Australia and New Zealand to be a true market leader in the industrial space, supporting the industry for over 70 years.

Pierlite is a business unit of Signify, the world leader in lighting. Together we have a shared purpose to unlock the extraordinary potential of light for brighter lives and a better world.

The MineMaster SB provides versatility with spigot or bulkhead mounting options & high quality of light for all applications, supplied with lumen select technology making it ideal for sites with a requirement for singular or multiple lumen outputs across multiple locations on a site, this allows for one common fitting with one product to order across the site.

- Multiple wattages/lumen outputs in one luminaire with a maximum of 70W
- Amber with T2 Optics and 4000K with T2 or T5 optics provide 0.2% maximum upward light
- Diecast marine grade aluminium housing with chromate and RAL9007 powdercoat finish with 27mm to Ø32mm spigot mount

Introducing the next generation Mine Master LED luminaire the industry has been waiting for. Purpose designed IP66 fixture with LED technology for the mining industry. Designed and developed in Australia to save energy costs and reduce on-site maintenance time using the latest generation LED technology.

- Durable aluminium or stainless steel body options
- Supplied with 4.6m power supply cable, internal circuit protection
- UV resistant moulded lens with integral IP66 silicone seal

The Nexus SB bulkhead provides a solid fitting for industrial applications needing a product built to last. The housing is manufactured from LM6 marine grade chromated aluminum and finished RAL 9007 grey powder coating. The luminaire LEDs are driven by a DALI2 Italian made driver providing lumen select capabilities allowing versatility for contractors or onsite electricians making it ideal for sites with a requirement for singular or multiple lumen outputs across multiple locations on a site, this allows for one common fitting with one product to order across the site.

- Multiple wattages/lumen outputs in one luminaire 35W, 50W & 65W
- Chromated Dicast LM6 marine grade aluminum, low copper content housing with RAL9007 powdercoat finish
- 4x 20mm and 2x25mm cable entries. Supplied with 2x20mm metal cable glands for cable diameter size 8mm – 13.5mm +/- 0.5mm

The Australian designed Vandalux adverse weatherproof range has a proven and trusted history of over 47 years being tough for all levels of industry and public areas including transport, correctional, schools, heavy industry and high vandalism / secure areas. The 6mm² terminal block and control gear has been selected to be simplified, ultra-efficient and versatile with Lumen Select Technology, 1 fitting with 21 wattages/lumen outputs in the same traditional body and diffuser allowing for easier and quicker installation allowing for the same appearance throughout your installation. Replaceable retrofit kits and gear trays are available for when upgrades are required.

- Pressure die-cast LM6 marine grade aluminum housing with RAL9007 powder coated paint finish and robust clear or frosted polycarbonate lens resist impact and abuse
- Up to 22 wattages/Lumen outputs available in 1 fitting, 2 sizes available 4FT (22W, 30W, 37W, 53W, 63W) and 2FT (16W, 20W, 28W, 33W)
- Colour temperatures available 3000K, 4000K, Blue, Red and Amber

The VandedLED CS is a robust weatherproof batten, built for tough Australian conditions. It is ideal for adverse, high impact areas such as walkways, schools, mining camps and public amenities.

- Strong IK10 polycarbonate RAL9007 grey body with an opalised diffuser
- Easily select your colour temperature from 3000K or 4000K
- Five optional cable entry points for versatility and ease of installation

Pierlite Vandalux LED Emergency with die-cast LM6 aluminium body with a frosted polycarbonate lens, modular gear tray.

- Pressure die-cast marine grade aluminum body with a green powder coated paint finish
- Covers five lumen outputs and wattages to help reduce the number of luminaire types in mains mode (65W-5628lm, 55W-5047lm, 38W-4092lm, 32W-3596lm & 23W-2837lm) & (32W- 2944lm, 28W-2576lm, 24W-2208lm, 20W-1840lm, 18w- 1652lm)
- Robust frosted polycarbonate lens resists impact & abuse with IK10 and high ingress protection of IP66

The NEW versatile and robust Rhino Floodlight is supplied with lumen select, allowing for single or multiple lumen outputs across various locations on site. The amber is suitable for environmental conditions such as fog, dust or adverse effects on fauna, while the 4000K is ideal for mining, open areas, car parks, warehousing and car or transportation yards.

- Ideal for harsh conditions, with superior housing made of LM6 grade die-cast aluminium, in addition to a chromated and powder-coated black finish
- Available in a 1723K (amber) asymmetrical light distribution or a 4000K in either symmetrical or asymmetrical
- Large 6mm² terminal block and 2x 20mm threaded cable entries

The MaxiMaster Floodlight has always had a trusted history of reliability through all variations of installations, the Gen3 is no exception and builds on the adaptability and versatility of its predecessor, the third generation provides the same shape and form as the generation 2 but with the added features of cable entries, terminal block, additional surge protection, lumen and colour select. Gen3 was built for the harsh Australian conditions for installations such as general industrial and public areas including warehousing, regional areas, transport facilities, custodial, schools, and heavy industry. The lumen and colour select technology provides the ability to have 1 luminaire with multiple wattages/lumen outputs in the same housing making it easier to replace keeping the same appearance through your installation.

- Provided with multiple wattages/lumen outputs in 1 fitting with wattages of 100W/150W/200W/250W and colour select with 3000K/4000K/5000K
- Supplied with 2 x 20mm cable entries, 2 x 20mm metal cable gland, 6mm² terminal block and an additional 10KV surge protection installed to the 4KV driver surge immunity
- L80/B10 = 54,000 hours @ an ambient temp of 50°C

PHILIPS

Lighting

ACTIVATE YOUR INFINITE POTENTIAL, **ACTISTAR**

Philips ActiStar inherits all the advantages you would expect from a Philips floodlight and now takes performance to a new level to illuminate your recreational sports fields and area lighting applications. It's an ideal solution for a wide range of lighting applications, such as sports pitches, container yards and ports, apron and industrial large areas and intersections. ActiStar will energise your sports facilities with uniformity and be able to enhance the safety of junctions by maximising efficiencies.

Offering optimised design for 1:1 retrofitting in a compact size with lower weight, wide choice of optics and high manufacturing quality. It can deliver sufficient light at higher efficacy and it incorporates best-in-class LED light sources, a modular optical system, a heat sink and driver into a one-piece housing that meets globally recognised safety standards. Its rigorously designed heat sink incorporates aesthetics and functionality to ensure excellent reliability. The superior lighting performance and longer lifetime activate your infinite potential with ActiStar.

Benefits

- ✓ Design optimized for 1:1 retrofitting
- ✓ Wide choice of optic for sports, road, and area applications
- ✓ High lumen efficacy on high lumen packages to cut luminaires installation quantity
- ✓ Enhance the safety of intersection roads by maximizing efficiencies
- ✓ Smart stadiums and great fan experiences start with Interact Sports
- ✓ Energize your sports facilities with best-in-class illumination and uniformity
- ✓ Compact size with an integrated driver gives you more flexibility and convenience in installation
- ✓ Equipped with Service Tag to provide assistance and support services
- ✓ Switching your HID high mast luminaires to ActiStar not only saves energy and operating costs, but it also allows you to achieve comparable photometric performance while cutting your luminaire quantity

Applications

- ✓ Airport Apron
- ✓ Port & Container Yard
- ✓ Large industrial areas / Car Park Areas
- ✓ Transportation Terminals & Tollways
- ✓ Recreational Sports Stadium
- ✓ Intersection Road
- ✓ General flood lighting

Features

- ✓ Philips brand stands for high quality, elegant and aesthetic
- ✓ Wide choice of optic for sports, road, and area applications to meet multiple needs
- ✓ Compact design one-piece design, driver inside of housing with light weight, help addressing customers' safety and easy installation concerns
- ✓ Compatible with Interact Sports systems
- ✓ Best-in-class LED to achieve higher efficacy on high lumen output.
- ✓ Compatible with various dimming drivers for various lighting control systems, future proof features.
- ✓ High-quality MSP coating with a robust design makes the installation suitable for harsh outdoor environment conditions

SUNSTAY - ALL IN ONE SOLAR STREET LIGHT

Integrated solar street light with Lithium Ferro Phosphate battery, solar panel and charger built into the luminaire. Pressure die cast aluminium for sturdiness and long life. Specially designed pole mounting bracket allows different tilt angles, lateral and pole top mounting.

Benefits

- ✓ Brings light to areas without access to electric grid
- ✓ Saves energy
- ✓ Preserves landscape as no trenching for cabling required
- ✓ Environment friendly
- ✓ Sturdy construction for long life

Applications

- ✓ Category P roads
- ✓ Rural areas
- ✓ Parks, pedestrian path lighting
- ✓ Industries, office, schools
- ✓ Shopping centres, corporate campuses, plazas

Features

- ✓ High luminous efficacy of 175 lm/Watt to maximize battery performance
- ✓ Replaceable Lithium Ferro Phosphate battery for long life and hassle free operations
- ✓ MPPT charge controller for maximum efficiency
- ✓ Pressure die-cast aluminum housing for sturdiness and excellent heat dissipation.
- ✓ Specially designed pole mounting bracket with adjustable tilt angles of 0 to 15 degrees, which can also be used in post top & lateral mounting positions
- ✓ Factory set dimming profile along with PIR sensor for run time maximization
- ✓ Self diagnostic feature along with battery charging, discharging & cut-off LED Indicators

ESSENTIAL SMARTBRIGHT

ALL-IN-ONE SOLAR STREET LIGHT RANGE UP-TO 4000 LUMEN

Integrated solar street light with Lithium Ferro Phosphate battery, solar panel and charger built into the luminaire. Optional pole mounting bracket. Microwave based motion sensor for optimizing battery autonomy.

Benefits

- ✓ Preserves landscape as no trenching for cabling required
- ✓ Saves energy
- ✓ Environment friendly
- ✓ Easy configurability with remote

Applications

- ✓ Gardens
- ✓ Walkways

Features

- ✓ Remote control for selecting lighting profile.
- ✓ Pole mounting Kit option available.
- ✓ High Lumen efficacy of upto 160lm/W
- ✓ Microwave sensor for run time maximization

The Pierlux Highbay 120 and 200W is the ideal light fixture for industrial and commercial applications. With an efficacy of 180lm/W, this fixture is improvement over the previous generation and is an ultimate energy efficient product to add to an installation.

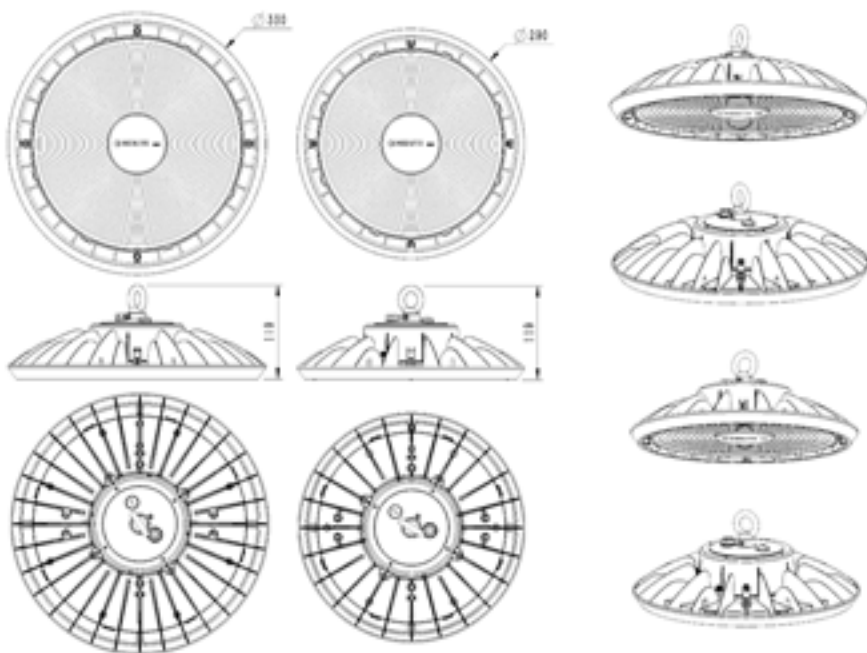

- Superior housing made of LM6 grade aluminium diecast, resistant to corrosion ideal for harsh conditions
- Built with high grade polycarbonate lens to prevent tampering and glass breakage
- Low maintenance with a long life of 60,000 hours at 50°C, 5 year warranty

The Pierlite 600W LED highbay is a robust industrial fitting made from an aluminium and steel construction with a single hanging point. The LED light source provides 133 Lumens per watt at 79,964lm and a 60° beam angle, making it an economical replacement for 1000W HID highbays.

- Aluminium and steel construction with black powder coated finish
- IP66 and IK10 rated
- High ambient temperature of 55°C

Warranty

Warden 2 DALI LED is a weatherproof exit luminaire in a rugged vandal resistant casing for areas requiring an impact and tamper proof option.

- Slimline, aesthetic and practical design
- One box solution, complete with optional pictogram inserts
- Special design applications are available on request

High performance IP66 surface mount LED emergency luminaire providing omnidirectional coverage in applications such as train stations, car parks, correctional facilities, fire passages, mining and warehouses.

- Compact design with removable gear tray
- Powder coated Die Cast housing & Polycarbonate lens
- High Spec IP66, IK10 & Ta50

INGRESS RATING PROTECTION (IP) DEFINED BY IEC 605908

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers. The first number indicates the measure of protection against the ingress of solids. For instance: IP2X.

The second number indicates the measure of protection against the ingress of liquids. For instance: IPX5.

Protection against the ingress of solid objects IP.1X

| IP No. | Example | Protection against contact and ingress of objects | Tests | Symbol | IP No. | Example | Protection against contact and ingress of objects | Tests | Symbol |
|--------|---------|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|---------|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| IP1X | | Protected against solid objects greater than 50mm ϕ | A large surface of the body, such as a hand (but no protection against deliberate access). Solid objects exceeding 50mm in ϕ | | IPX1 | | Protected against dripping water | Dripping water (vertically falling drops) shall have no harmful effect | |
| IP2X | | Protected against solid objects greater than 12mm ϕ | Fingers or similar objects not exceeding 80 mm in length. Solid objects exceeding 12mm in ϕ | | IPX2 | | Protected against dripping water when tilted up to 15° | Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position | |
| IP3X | | Protected against solid objects greater than 2.5mm ϕ | Tools, wires, etc., of diameter or thickness greater than 2.5mm. Solid objects exceeding 2.5mm in ϕ | | IPX3 | | Protected against spraying water | Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect | |
| IP4X | | Protected against solid objects greater than 1.0mm ϕ | Wires or strips of thickness greater than 1.0mm. Solid objects exceeding 1.0mm in ϕ | | IPX4 | | Protected against splashing water | Water splashed against the enclosure from any direction shall have no harmful effect | |
| IP5X | | Dust protected | Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment | | IPX5 | | Protected against water jets | Water projected by a nozzle against the enclosure from any direction shall have no harmful effect | |
| IP6X | | Dust tight | No ingress of dust | | IPX6 | | Protected against heavy seas | Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities | |
| | | | | | IPX7 | | Protected against effects of immersion | Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time | |
| | | | | | IPX8 | | Protected against submersion | The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer. NOTE: Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects | |

INGRESS RATING PROTECTION (IP) DEFINED BY UTE 20010

DEGREE OF IMPACT PROTECTION EN62262

IK rating system is an International classification showing degrees of protection provided by luminaires against external mechanical impacts.

| Number | Measure of protection – impact energy (joules) | Test | Number | Measure of protection – impact energy (joules) | Test |
|--------|------------------------------------------------|---------------|--------|------------------------------------------------|--------------------------|
| | No protection to this standard | - | | 1.00 | 0.50kg impact from 200mm |
| | 0.15 | 0.20kg impact | | 2.00 | 0.50kg impact from 400mm |
| | 0.20 | 0.20kg impact | | 5.00 | 1.70kg impact from 295mm |
| | 0.35 | 0.20kg impact | | 10.00 | 5.00kg impact from 200mm |
| | 0.50 | 0.20kg impact | | 20.00 | 5.00kg impact from 400mm |
| | 0.70 | 0.20kg impact | | | |

When higher impact energy protection is required 50 joules is recommended.

TABLE FOR CHEMICAL RESISTANCE

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers. The first number indicates the measure of protection against the ingress of solids. For instance: IP2X.

The second number indicates the measure of protection against the ingress of liquids. For instance: IPX5.
